

Overdose Alert

(August 21, 2024)

Life-threatening drugs likely are circulating and lives are at risk.

All street drugs must be considered highly toxic; and potentially fatal.

Reduce Your Risk

- Don't use alone
- Carry naloxone
- Don't mix drugs
- Go slow

Signs of an Overdose

Dizziness
or disorientation

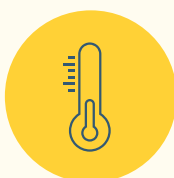

Discolouration
of lips and nails

Breathing
slow or absent

Pupils
very small
(pin point)

Cold
or clammy skin

Choking
or coughing,
gurgling, or
snoring sounds

**Can't be
woken up**
